ACE-WOS

AI Culinary Education & Workforce Operating System | Culinary Education 4.0

Extend culinary learning beyond the kitchen without replacing the hands-on lab. ACE-WOS is designed to keep students connected when learning occurs at school, at home, after school, or during temporary interruptions to lab access.

BUILT FOR CULINARY EDUCATION	PROGRAM VALUE
• 200 instructional days, September-June • ServSafe Manager preparation mappings • Daily objectives, Do Nows, safety, vocabulary and evidence • Google Classroom publishing workflow • Teacher authoring, versioning and approval controls	• Continuity for students learning away from the lab • Instructor-controlled mastery and grading • Student progress and evidence visibility • GEMS/state documentation support • AI support that augments - not replaces - the educator

The kitchen is still the laboratory. ACE-WOS makes learning possible beyond its walls.

Next step: Request an ACE-WOS Culinary Education 4.0 demonstration for your culinary/CTE program.
